CAREER GOALS

Graduated with a major in software engineering from FPT Polytechnic College. With the professional knowledge that has been learned, I'd like to work as a java backend developer in your company. I feel so grateful when I become one of employees in your company. As a fresher in Java backend, I'll dedicate for job, complete all of tasks with high quality and on time. Within 6 months, junior Java backend is my short-term goal. I believe with my professional skill set, hard-working, learning which can help your company more and more development.
